

## 1

## Attack on Earth!

Zoosh through Robert Shapiro

March 7, 1995

**T**his is a red-hot flash for all lightworkers everywhere! Spread this around, please. As commented in the first *Shining the Light* book, the battle has begun. The battle is not between what you see as the forces of light and dark, but rather the battle is within yourself. And the battle is truly between allowing, unconditional love vs. impatience and greed. Now, if you understand — and this is essential — if you can understand that you do not have people who are unconditionally loving all the time, or people who are greedy all the time, then you will be halfway home. This battle that is engaged fully right now is for all to take note within themselves: In order to be allowing and unconditionally loving, this means that *all things, all life, is allowed to be what it is*. Any life that disrupts, corrupts, attacks or otherwise interferes with any other life, when that life is not fully willing, is functioning within the dark side. All of you, because of your society, are necessarily enmeshed with the dark side. You must recognize these characteristics within yourself — primarily impatience and greed. Hate, anger, yes, all of these things that you recognize — but impatience and greed are the most important.

Now, as we speak, areas that have been sacrosanct — totally sacred, set apart — are being attacked. Do I mean people? No, no. I mean that the sacred minerals, that which you think of as products, are being ripped from the Earth without its permission. You are physical beings; you know that you need vitamins and minerals to survive. What does that tell you? Since your bodies are made up physically of Mother Earth's body, she also needs her vitamins and her minerals to survive.

pole in Tibet is almost totally closed now because of the invasion by China. This closure happens only when there are attacks to the ground as well as to the people. This is what I believe will occur:

In the Southwest there will be widespread flooding on a regular basis. I'm not predicting a great flood; I'm saying that *regular flooding will occur all the time*. The 1% chance per year of a major flood such as a hundred-year flood will increase to 30% per year. Ask your oddsmakers what this means. It is also very possible that if uranium is removed from Hopiland, there will be earthquakes of significant magnitude on the west coast of the United States, the east coast of the United States, and on the opposite side of the world — significantly, China and Tibet. Be on the alert, Afghanistan and Japan! It is especially important for the people of Japan, because much of the magnetic pole and bipolar flotation effects that keep the island of Japan intact have to do with the mineral deposits on the other side of the world. Be aware that mineral deposits are as important to Mother Earth as the minerals you must have in your body; if you do not have them, you get sick and die.

***You said earlier that the secret/shadow government was already planning to extract these minerals from old tunnels that already exist. Can you expand on that?***

Underground tunnels used by the secret government have intersected certain mine shafts, bringing their attention to the presence of uranium they desperately needed for their nefarious deeds. They did not care that it was near and goes directly under this holy place (for Hopiland is indeed a special place, partly because the Hopis are there, but primarily because of the place itself). The Hopis are there to guard it!

So the secret government decided that they would move quickly, before legal action could be carried out. (Simply taking legal action may not be effective; for example, clear-cutting an entire forest before the law can move.) They could dash underground, get as much as they can get their hands on, and get out before anyone could stop them. That is their intent. The plans are being laid right now, and the initial activities, including the cutting of core samples and the analysis of same, has taken place already.

Certain mining companies that are already in place may be drafted into participation. Mining companies who have long-term contracts and can't say no to some people will be left holding the bag when the lawsuits begin. Be aware.

***Okay, what to do right now, besides the light . . .***

By all means, demonstrate. Carry signs, but *do not under any circumstances be violent*. Take a lesson from the civil rights demonstra-

tions of the South. Nonviolence did succeed. If you are violent, it will just add to the agitation and will keep you fighting amongst each other. The secret government has fostered this sort of thing for years and years to keep you confused while it pulls the rabbit out of the hat. *This situation is a rabbit that the hat cannot afford to lose!*

Within two and a half weeks, the mining, the drilling, will be happening. If uranium is removed from under Hopiland, it will be a crisis beyond all understanding. Uranium is Mother Earth's brain and nervous system. As you know, much uranium has been removed from the Earth in the southwestern United States as well as other places in the world. The Southwest is important. Your scientists have noticed in recent years that the weather patterns have become chaotic: huge storms, June snowstorms, totally unexpected snow in the South where snow is not usually experienced, earthquakes where they're not expected.

Mother Earth's primitive brain is dense — a very critical mass, uranium. It is correlated to your experience of the upper portions of your spinal cord as it taps into your primitive brain, or your id. If this uranium is taken out from under Hopiland, Mother Earth's nervous system will not be able to function as it has in the past. Weather will not only be unusual, it will be chaotic. Hurricanes may blow straight inland; they'll keep building up strength over, say, Minnesota! Your weather people will say, "Impossible!" but I'll say, not impossible, just not normal.

Maybe you'll have volcanoes erupting like crazy before their time sequence. Do you know that the volcanoes, especially the ones up in the state of Washington, are intended by Mother Earth to erupt about 450 years from now in a spectacular fashion that will essentially unite the up-state coast of what is now Washington State, with Vancouver Island off the coast of Canada. This landmass is expected to extend 450 years from now, when people will have been redistributed.

But suppose this happened now. Can you imagine the level of catastrophe? The signal that would be transmitted through Earth's nervous system would be disrupted! The choice is before you: You can live a healthful life if you just live properly, or you can abuse yourself and come down with a nerve disorder that will cause you to suffer horribly and die a ghastly death. You have your choice right now.

***What can stop this?***

Public awareness can stop it. Write to your congressmen. Call them, telegraph them. It is true that the secret government, the shadow government, is not apportioned only of the United States. Mining operations can be detected from above the surface. If the mining is not authorized, there is a tremendous amount of pressure your government can bring to bear, to say nothing of what your legitimate military can do if they are

told to go in and stop it immediately. Believe me, they have the means to do it. The secret government's attitude will be, "Well, we'll wait." But it can be stopped, and if you stay vigilant, it will keep it stopped. But you will have to stay vigilant.

***There was something a few weeks ago about the electric company coming in to put in power poles on Hopi mesa. Is that connected with this, or are they separate situations?***

It is connected, you might say. There are certain people there who would like to have the utilities and the support of modern conveniences. However, think about this:

Instead of running a small amp service to Hopi mesa, what would happen if, unbeknownst to the Hopis, a megawatt service was put in? Or even ten times the needed voltage? Do they expect the Hopis to suddenly give birth to ten times as many people and thus need that much? No, it would be to serve the industrial base they hope to build there. Let's understand something about mining companies: They build smelters and processing plants as close as possible to the source of their raw materials for both convenience and economy. They intend to put heavy industrial processing plants as close as possible to the Hopi reservation, possibly on the Navajo reservation, on what they would conveniently refer to as "disputed territory." They would get what they would call a "temporary" lease — which would last a good thirty years, mark my words! — to build what they want, and they would use a tremendous amount of electrical power. You know, there is no dispute between the Navajos and the Hopis that they can't amiably work out themselves. It's happened because other people are interfering and trying to shift people away from certain locations so that they can secretly do things in those places. This is known by many, but it is good to get it out more widely.

You just have to understand that it's no longer the case that the rainforest can be demolished while they mine and dig and drill for portions of Mother Earth's body, and you can still go on about your business. No. When they drill into the heart of Mother Earth, when they remove her brain, this affects everyone equally. You can't just say, "Oh, well, we do what we can," or "We do the best we can." You have to *act!*

***Do they plan to go through Williams?***

Yes, through Williams.

***They want to go underground?***

They want to do everything underground! The whole purpose of demonstrations is to create confrontation so there can be publicity. But if everything is going on underground, it eliminates confrontation, you

see?

## YHWH through Arthur Fanning

March 7, 1995

**S**o you've got a quandary, eh?

***Yes. What can we do about it? How should we proceed? Zoosh said two and a half weeks.***

You have pushed yourselves to your spiritual edge at this time. Know you what I mean? What has been spoken of is true. It is what has been talked about in what you term your great prophecies, the cataclysms, and we've told you before that it is within the consciousness of mankind to change these things. Did you think we were kidding?

So you are on your spiritual brink. Those of you who have the power will tune into the God forces that you are, will what you call "decide" to play with that united portion of your brain that we've talked of many times, the one brain, eh? And that will assist in ceasing, we say slowing down, because when these things begin, your fears (simply walking in your street) are going to manifest tenfold. Not because of the weather patterns and changes, but because you have lost the opportunity to become the masters of your own destiny any longer, in the manner that you have not been taking the seriousness of any teachings that we turn you to, your power and the power of the individual consciousness; you haven't taken them seriously; you take them for your little chitty-chats until, as I've joked before, you get right to the edge! Then you begin to run.

The point you're going to have to concede, now, unto your own self is, you must connect with what you term — this applies individually, now — with your spiritual portion of your being that is residing in what is termed the Pleiades and residing in what is termed, some of you, Orion and the Sirian system. You are connected to all of these things. You must connect now. We're past the game of playing. Because you must remember now, many of you still reside on some of the councils that are assisting these ones to pull this off.

***Many of us have aspects that are of the dark forces?***

Let's not use "dark forces," let's simply say [aspects that are] not willing to rush into enlightenment.

So we now begin to petition, put it this way, with the unified brain

that you have, know you? What we spoke of in our meditations. There is a purpose for these things being given, a purpose for you to understand that your brain is simply a tool to allow the thought to be sent through the filter, know you? For you choose what you filter, and you can control, you can alter. Because out there, you understand you are God. But you must be able to do that, you see, as you disseminate the information, or spread it out, know you? Put it out there. The ability to change it at this time is going to require an awful lot of what you term the opinion of the public. But the public is not interested in their God forces. It'll take a grouping willing to concentrate in what you term the etheric, in other levels, to create this shifting. Now I will tell you this: there are many things going on this month to alter and to prevent there be the destruction of the planet, the complete destruction. There are going to be these great quakings; we're not going to completely stop what is occurring here. And it is neither good thing nor bad thing, it is however a sad thing this is occurring in the first place.

***Are they going to occur whether or not the shadow government mines the uranium?***

What you call your quakings?

***Yes.***

They're going to occur, but this portion . . .

***If they pull that uranium out, are they going to accelerate the process?***

There will be much acceleration and much greater magnitude. It will create such a destabilization that this will require what you term major surgery. What you term, in a manner, rescue. And if the rescue is required, mankind will not have any say at all what is going on. You have a little bit of free will left (we made a joke about this before), yet you still have some. These forces now are . . . it is, in a manner, the battle has begun.

It is all in a manner also, this system, you are learning to become a unified being within yourself, in your metaphysics, your polarities, unified being within your brain, know you left/right, here? Single brain, indeed; as it goes forward to that sequence [to become unified] it's called, from your perspective, the parts that are left behind, so to speak, have fear. Know you how part of your fears don't want to die? It is the same with any portion of your personality that you have utilized — your personality trait that you have utilized to get this far in your lives, as you think it is in your evolution you think they are needed in the future. That is not so.

In this game being played here now there has already been one visit to those that are participating in this game. And they have been talked to

on many levels now. And again the choices. There is the possibility that it can be stopped, or at least the severity lessened. However, the likelihood is very, very small.

***That it can be stopped or lessened?***

Well, that it can be lessened; it cannot be stopped. We're going to do a portion of this thing anyway. Now, pay attention to this: What is important is that the information does indeed get out, know you? And when the fan is hit by the feces, then those that see what is happening will have an opportunity to see who is causing this thing, and how you can correct. Because when the rescue begins, if it comes to that point, you will still know how to, I will say, once the balance has been set again, you will still need to know how you continue your consciousness here. How you utilize it. Not left/ right. Know what I mean?

***How you utilize your consciousness . . .***

Not left/right brain.

***Oh, yes, integrated, unified.***

Indeed. You are going to have to know how to do that. The majority of mankind isn't even aware that that process exists, know you? They think they think in your brain here. Among you metaphysical people you think that thing also.

***Will we be working on that in the next intensives?***

We have started the process. It is difficult; we have already started it, say, several years ago. You beings quit when you get your headaches. It is a seam growing together here [top of head].

Now about this thing in your mesa. It is indeed a good place. A place of high energy, a place of power. If you will see some of the other happenings that are occurring upon your planet, that some of the records are moving out of what is termed the Tibetan archives, you term them sanctuaries. So too we will say, some of the energies are being moved from the Hopi arena, have shifted a bit.

***What do you mean by energies? People, things, records?***

The energies, I will term; what you have within your mineralization on that mesa are records. It has always been mankind's selfishness and greed that has caused his own demise. But what occurs — don't worry, you'll live forever, yet you can go through your oops in this time. I'm being a little light and also it is very serious because your friend is right: great, great destabilization to the planet. You're watched over here, you're not going to destroy it, even though you think you can. Now. What is occurring at the end of this month, know you your equinox?

***Yes.***

There is great power being raised, great power being set, open-ed. It be time, if one concentrates on the unification of his consciousness, it will only take what would be termed twelve beings, together, to alter this thing. But it takes twelve thinking here [points to area above head], not in here [points to brain].

***Zoosh said two-and-a-half weeks from today [i.e. the 24th of March], they were going to be mining, and the equinox is the 21st of March.***

Well, I believe we have a Friday night then. That's a coincidence, eh? [Laughter.] I am involved with the group that sits on the edge of the cliff and runs when the chasm opens wide! Any other questions?

***We'll get this out to as many people as possible, even though you're saying we can't stop it?***

Well, let's put it this way: You won't stop it with public opinion at this time. What you will stop it with is the beings that you have been . . . Do you think I've been working for nothing down here? [Laughter.]

***Even though the information won't stop it, it'll still be helpful to get this out, right?***

Indeed. Because when these things begin to shift — and we're going to alter as much as we can, you understand — *you* beings are, you know. As you begin to shift and what you alter, at least you have put the information out that a lot of the weather changes are indeed involved with what these beings are doing and not unified in consciousness with the planet; they'll understand. Others will, you understand? Humanity.

***Is there any sense in going to these miners? These miners are going to be sort of coerced and then Zoosh says they'll be left facing all the lawsuits.***

Well, they're already being talked to, know you what I mean? I and others have been talking to their hearts. And I've been known to create what you would term an attack of the heart, till I get your attention.

***Oh. But, I mean, if they're forced by the secret government, no matter what their hearts say, are they going to be strong enough to stand up to it?***

I'm also talking to these beings that you term your secret government.

***Oh! Not to do this thing.***

I talk in my own manner. The greater purpose, however, is that you beings are going to begin to understand that you are loved indeed, consciousness is yourselves about your planet, know you? That you are aware. Then your secret government, as you wish to term it, the military, won't be able to control you anymore, no matter what they do. They are a dying tiger now, you must understand. Don't take it too personally. And you're all doing as best you can, we understand this, we see these things.

Well, you're also taking care of this in what is termed those months of six we play with, know you?

***When we ask for this unified consciousness . . . what makes our heads hurt? What's resisting it?***

Portions of the brain identify themselves as portions of personalities.

***And like you said, they don't want to die. But they don't have to die.***

Not at all!

***They can get expanded into the larger consciousness.***

They blend into one. Know you the crystals we put in your head at times? That is to sort of sew this seam in the middle together so it gets used to being one brain. And you need that, because it requires an opening of more circuitry and it allows a lot of thought to come through so you may pay attention to what you want to participate in and what is going on where. It will take time for you beings to understand the miracles that you are and that you are playing with.

Right now your moneys are the most popular things. That's all right. Your Earth and its stability is very popular. Your weather and its predictability is popular. Pretty soon it's all going to become unpopular. Because you don't know who you are. A lot of you think you do; that is almost as dangerous as not knowing. Sometimes more so. But you will learn. There is no other alternative. We are through.

You cannot survive well without them and you do not live pleasantly or to an old age. That's why the foods you eat have nutrients in them.

You must look sharp now. It is time to stop taking minerals out of the Earth. As we speak, those forces of greed and impatience are lusting, planning and even grabbing minerals out of a sacrosanct area known as Hopiland. For many years now, the elders of this tribe have been crying that if Hopiland is attacked, what will happen is what has already happened to Tibet. These two sacrosanct areas, which are protecting the pathways to the Inner Earth — both of them will be overrun by the forces of greed, impatience and darkness. The Inner Earth, *which is the reservoir of unconditional love and allowance*, will be shut off and people on the Earth will have to work harder, much harder, to be allowing and unconditionally loving.

So you forces of light out there, you forces of unconditional love — **it is absolutely essential that every day, without a day going by, you spend a few moments broadcasting loving light**. Now, what is loving light? Loving light is light with the colors of the rainbow in it, and/or gold light. Gold light has the capacity to move, it is kinetic. Loving light has the capacity to heal, for it is loving.

So you have your assignment. You must do this now and tell all your friends to do it. Have them send unconditional love, allowance, loving light, gold light, healing energy to Hopiland and Tibet so that the doorways to the Inner Earth are not sealed. If they are sealed by those who reside there, there will be much less radiation of this energy to the surface. And while you will be able to produce allowance and unconditional love, you will have to work very hard to do it.

This emergency means that everyone will have to come together as groups. Not someday, but *right now!* This is a call to arms. Pay attention. Act now.

***The Hopi have a prophecy that if their homeland mesa is mined — which we understand the shadow government is attempting to do at this very moment — there will be worldwide floods and earthquakes. Can you discuss that?***

I will. People do not understand the strong links. Some times ago, the poles — the North and South poles — were open. Admiral Byrd, who happened to fly into the Inner Earth one day with his group, saw the inner world. It's hard to imagine that a person of his standing was not believed, but he was not; yet he knew what he saw. However, because of excess activity in these areas and because of the forces of impatience and greed — mining, digging, drilling — these poles were closed. The auxiliary poles (meaning the places where the radiance and beauty could exit) in Tibet and in Hopiland were activated more strongly. The auxiliary
